

MASULDAR ARIF

Automation Test Engineer

+91-9948964342 | masuldararif09@gmail.com | Hyderabad, India

PROFESSIONAL SUMMARY

Results-driven Automation Test Engineer with 4.10+ years of experience in Software Quality Assurance, Test Automation, and Manual Testing across e-commerce and retail. Proficient in Selenium WebDriver (Java), Playwright (TypeScript), Cucumber BDD, TestNG, and REST API Testing using Postman. Proven ability to design scalable automation frameworks, improve test coverage, and reduce defect leakage. Experienced in Agile/Scrum environments with strong expertise in SDLC, STLC, CI/CD pipelines, and defect lifecycle management.

TECHNICAL SKILLS

Programming	Java (Core Java SE), TypeScript
Automation Tools	Selenium WebDriver, Playwright, AutoIT
Frameworks	Cucumber BDD(Serenity), TestNG, Data-Driven, Page Object Model (POM)
API Testing	Postman (REST API), JSON, XML
CI/CD & DevOps	Jenkins, Maven, Git
Defect Tracking	JIRA
AI Tools	Copilot, PQAI, Claude ,Cursor
Database	MySQL
Methodologies	Agile Scrum, SDLC, STLC, Defect Life Cycle
OS	Windows 7 / 10 / 11

PROFESSIONAL EXPERIENCE

ATEM Software Solutions Pvt Ltd

Senior Software Engineer

Hyderabad, India

May 2026 – Present

- Developed and maintained robust test automation frameworks using Java, Selenium WebDriver, and Cucumber BDD(Serenity).
- Automated end-to-end functional, regression, smoke, and sanity test scenarios for web applications.
- Designed and implemented Page Object Model (POM) and reusable automation components to improve framework scalability and maintainability.
- Performed API testing using REST Assured and Postman, validating request/response structures and business logic.
- Integrated automated test suites with Jenkins CI/CD pipelines for continuous testing and faster release cycles.

Asics Technologies Pvt Ltd

Automation Test Engineer

Hyderabad, India

Jul 2025 – Apr-2026

- Design and implement end-to-end automation frameworks using Selenium WebDriver (Java) and Cucumber BDD for the Kogan.com e-commerce platform (Australia).
- Write feature files in Gherkin syntax defining expected application behavior and develop step definitions connecting Gherkin steps to automation scripts.
- Develop comprehensive test scenarios covering various use cases and edge cases based on business requirements and user stories.
- Create and maintain end-to-end automation scripts using Selenium WebDriver for complete customer journey flows.
- Execute Cucumber test suites regularly to validate application functionality and report results to stakeholders.
- Commit and maintain automation test code in version control repositories ensuring clean and reviewable code.

- Collaborate with developers and team members to reproduce, address, and track defects through resolution.

WNS Global Services

Associate – Operations

Hyderabad, India

Sep 2024 – Jun 2025

- Supported QA operations and process validation for the NEO Portal internal platform used across WNS.
- Analyzed functional requirements from FRDs to identify test scenarios and objectives for the Neo Portal.
- Designed and executed functional, end-to-end, regression, and system test cases for Neo Portal features.
- Developed automated test scripts for Neo Portal using Selenium WebDriver with Java and TestNG.
- Delivered daily test execution and bug status reports to project management and stakeholders.
- Logged and managed defects in JIRA, ensuring thorough tracking and follow-up until closure.

Exner Technologies Pvt Ltd

Test Analyst

Hyderabad, India

Aug 2021 – Aug 2024

- Analyzed business requirements and functional specifications to design comprehensive test plans and test cases.
- Executed manual and automated test cases for web applications using Selenium WebDriver with Java.
- Developed automation scripts using Page Object Model (POM) and Data-Driven frameworks with TestNG and Cucumber BDD.
- Performed API testing using Postman to validate RESTful service endpoints and data integrity.
- Conducted cross-browser and cross-platform testing to ensure application compatibility across environments.
- Integrated automated test execution into Jenkins CI/CD pipelines for continuous testing.
- Optimized test execution cycles by 40% through automation framework enhancements and parallel execution.
- Tracked and managed defects in JIRA, maintaining clear status updates for all stakeholders.
- Automated 200+ test cases across multiple modules, significantly reducing manual regression effort.
- Participated in Agile Scrum ceremonies – sprint planning, daily stand-ups, and retrospectives.

KEY PROJECTS

Project 4 – Broadridge Financial Solutions - Enterprise Web Application

Client	Qualizeal Technologies
Domain	Financial Services / FinTech
Technologies	Core Java, Selenium WebDriver
Testing Type	Automation Testing
Duration	May 2026 – Present

Enterprise financial platform providing solutions for wealth management, capital markets, asset servicing, investor communications, proxy voting, and regulatory compliance. Responsible for automation testing using Java, Selenium WebDriver,, Cucumber BDD(Serinity), REST Assured, and Jenkins in an Agile environment.

- Developed and maintained Selenium WebDriver automation frameworks using Java, and Cucumber BDD(Serinity).
- Automated end-to-end business workflows for financial transactions and investor services.
- Created and executed regression, smoke, sanity, and functional test suites.
- Designed reusable Page Object Model (POM) components.

Project 3 – Kogan.com E-Commerce Platform

Client	Kogan.com (Australia)
Domain	E-Commerce
Technologies	Core Java, Cucumber BDD, Selenium WebDriver
Testing Type	Automation Testing
Duration	July 2025 – Apr 2026

Kogan.com is one of Australia's leading online retailers offering electronics, home appliances, furniture, and lifestyle goods. The platform operates on a direct-to-consumer model focusing on value, affordability, and competitive pricing. Responsible for end-to-end automation testing covering customer-facing features and backend workflows.

- Understood business requirements and user stories to develop relevant and comprehensive test scenarios.
- Wrote feature files in Gherkin syntax defining the expected behavior of the application for each sprint.
- Developed step definition code in Java to connect Gherkin steps with Selenium WebDriver automation scripts.
- Created end-to-end automation scripts using Selenium WebDriver covering complete user journeys.
- Executed Cucumber test suites regularly to validate application functionality and track test results.
- Collaborated with developers to reproduce and resolve defects, tracking progress through JIRA.
- Committed automation test code to version control repositories and maintained code quality standards.
- Participated in Scrum meetings discussing bugs, test status, and sprint deliverables.
- Delivered all assigned tasks for every sprint release to production without issues.

Project 2 – NEO Portal

Client	WNS Global Services
Domain	Enterprise / Internal Portal
Technologies	Java, Selenium WebDriver, TestNG, API Testing
Testing Type	Manual and Automation Testing
Duration	Sep 2024 – Jun 2025

The Neo Portal is an internal platform developed by WNS to streamline employee access to various organizational tools and resources. It serves as a centralized hub for key operational activities and information sharing within WNS, accessed through the company's eSpace environment.

- Analyzed functional requirements from FRDs to identify test scenarios and test objectives for the Neo Portal.
- Designed and documented functional test cases, end-to-end test cases, regression suites, and system test cases specific to Neo Portal functionalities.
- Prepared comprehensive test plans, documented detailed test scenarios, and conducted peer reviews for team deliverables.
- Delivered daily test execution and bug status reports to project management and stakeholders.
- Actively participated in daily defect triage meetings with developers, business stakeholders, and clients regarding Neo Portal issues.
- Developed automated test scripts for the Neo Portal using Selenium WebDriver with Java and TestNG.
- Conducted detailed analysis of test results against functional requirements outlined in the FRD.
- Logged and managed defects in JIRA, ensuring thorough tracking and follow-up until closure.
- Debugged and modified existing automation scripts to enhance test coverage and maintain reliability.
- Contributed to framework design and enhancements to support Neo Portal automated and manual testing initiatives.

Project 1 – BestBuys Online Retail Platform

Client	Bestbuy.com
Domain	E-Commerce
Technologies	Core Java, Selenium WebDriver, TestNG, Cucumber BDD, Maven
Testing Type	Automation & Manual Testing
Duration	Aug 2021 – Aug 2024

An online retail platform offering a wide range of consumer electronics. Responsible for both manual and automation testing ensuring seamless user experience and stable product releases across all sprint cycles.

- Developed and executed automated test scripts using Selenium WebDriver, Java, and TestNG.
- Performed Smoke, Functional, Integration, and Regression Testing across all application modules.
- Conducted Data-Driven Testing and Parallel Execution using TestNG and Maven.
- Optimized test execution cycles by 40% through automation framework enhancements.
- Collaborated with developers and product owners to review requirements and improve test coverage.

KEY ACHIEVEMENTS

- Automated 200+ test cases across projects, reducing overall test execution time by 40%.

- Improved regression coverage using a custom Data-Driven Framework built in Selenium WebDriver.
- Reduced defect leakage by 30% through early bug detection and efficient defect triaging.
- Introduced Playwright (TypeScript) automation, improving test reliability and execution speed.
- Recognized for maintaining high-quality QA documentation and consistent on-time delivery across all sprints.

EDUCATION

Bachelor of Science (B.Sc.) in Computers

2021

Acharya Degree College, Zaheerabad – Osmania University
