Objective

A computer science graduate with strong problem-solving abilities, analytical thinking, teamwork skills, and a foundation in Java and backend development, seeking an entry-level role to contribute effectively to software projects and grow professionally.

Skills

Programming Languages	Java, C++, Linux
Frontend Technologies	HTML, CSS
Backend Technologies	Spring Boot
Database	SQL
UI/UX Design	Figma
Version Control System	Git, GitHub
Soft Skills	Critical thinking, Team Collaboration, Adaptive Learning

Education

Saveetha Institute of Medical and Technical Sciences Bachelors of Engineering in Computer Science Engineering C.G.P.A:8.7	2022 - 2026
Sri Chaitanya Junior College Mathematics, Physics and Chemistry Percentage:89%	2020 - 2022
Siddhartha High School Secondary School C.G.P.A:9.8	2019 - 2020

Certifications

- Oracle Java SE17 Developer
- Oracle AI Vector Search Professional

Projects

Hardware Trojan Detection – Gradient Boosting (Google Colab, IBM SPSS)

- Designed and implemented a machine learning–based Hardware Trojan Detection system using Gradient Boosting, achieving higher detection accuracy compared to traditional Support Vector Machines (SVM) through optimized feature learning.
- Performed comprehensive data preprocessing and feature selection on benchmark hardware datasets sourced from Kaggle, enabling effective identification of malicious circuit modifications.
- Conducted experimental evaluation and comparative analysis using IBM SPSS 2026, validating model performance.

Job Secure – Job Portal Application (Spring Boot, SQL)

- Designed and developed a role-based job portal application using Spring Boot, clearly separating Admin and User responsibilities, where admins can create and manage job postings and users can search, view, and apply for jobs based on relevant criteria.
- Implemented RESTful backend services and integrated an SQL database to handle user data, job listings, and job applications, ensuring proper data validation, structured schema design, and smooth end-to-end request handling.
- Deployed the application on AWS Cloud, gaining hands-on experience with real-world deployment. Managed job postings and applications using structured SQL schemas with 100+ sample records for testing and validation.

Languages Known

- Telugu, English, Hindi
